

IN THE CLAIMS

Claims 1-4, 9-11, 13, and 15 have been amended and claim 8 has been cancelled without prejudice:

1. (CURRENTLY AMENDED) A call error prevention method, said method comprising:
 - receiving digits comprising a call number;
 - providing a call send signal to indicate the call number is complete;
 - determining whether the call number contains the same number of digits as a recognized the-recognized call service code; and
 - generating an input error warning if the call number starts with the recognized call service code and if the call number does not contain the same number of digits as the recognized call service code.
2. (CURRENTLY AMENDED) The call error prevention method of claim 1, further comprising transmitting the call number to a communication network for placing the call if the call number does not start with the recognized call service code.
3. (CURRENTLY AMENDED) The call error prevention method of claim 1, further comprising transmitting the call number to a communication network for placing the call if the call number contains the same number of digits as the recognized a-recognized call service code.
4. (PREVIOUSLY PRESENTED) The call error prevention method of claim 1, further comprising receiving again the call number to correct a call error.

CLAIMS 5-8 (CANCELLED)

9. (CURRENTLY AMENDED) A call error prevention method, said method comprising:
 - inputting digits comprising a call number;

providing a call send signal to indicate the call number is complete;
checking whether the call number starts with a recognized emergency call number;

determining whether the call number contains the same number of digits as the recognized ~~a-recognized~~ emergency call number; and

generating an input error warning if the call number starts with the recognized emergency call number and if the call number does not contain the same number of digits as the recognized emergency call number.

10. (CURRENTLY AMENDED) The call error prevention method of claim 9, further comprising transmitting the call number to a communication network for placing the call if the call number is not the recognized ~~a-recognized~~ emergency call number.

11. (CURRENTLY AMENDED) The call error prevention method of claim 9, further comprising transmitting the call number to a communication network for placing the call if the call number contains the same number of digits as the recognized ~~a-recognized~~ emergency call number.

12. (PREVIOUSLY PRESENTED) The call error prevention method of claim 9, further comprising receiving again the call number to correct a call error.

13. (CURRENTLY AMENDED) A communication unit adapted to check a call number against a ~~store~~ plurality of recognized call service codes, determine whether the call number starts with one of the plurality of recognized call service ~~code~~ codes and whether the call number contains the same number of digits as ~~[[a]]~~ the one of the plurality of recognized call service ~~code~~ codes, and generate an input error warning if there is a mismatch in the number of digits between the call number and the one of the plurality of recognized call service ~~code~~ codes.

14. (CANCELLED)

15. (CURRENTLY AMENDED) A communication unit adapted to check a call number against a store plurality of recognized emergency call numbers, determine whether the call number starts with one of the plurality of recognized emergency call numbers and whether the call number contains the same number of digits as ~~a recognized~~ the one of the plurality of recognized emergency call ~~number~~ numbers, and generate an input error warning if there is a mismatch in the number of digits between the call number and the one of the plurality of recognized emergency call ~~number~~ numbers.
